Drs. Christianto Wibisono

Golden Rule

- The **Golden Rule** or **ethic of reciprocity** is a maxim,[1] ethical code or morality[2] that essentially states either of the following:
- (Positive form of Golden Rule): One should treat others as one would like others to treat oneself.[1]
- (Negative form of Golden Rule): One should not treat others in ways that one would not like to be treated (also known as the Silver Rule).
- This concept describes a "reciprocal", or "two-way", relationship between one's self and others that involves both sides equally, and in a mutual fashion.[3][4]

Steven Tong

- You don't need to be jealous to other.
- If you really better than other, demonstrate that you are the better or the best.
- If you are lesser than other, be sportive and recognize other people who are better than you.
- But people usually take the Cain vs Abel route jealousy, hatred which ended in tragic murder.

Quantum Leap

- Humankind have made giant quantum leap in their development of rational invention in terms of technological capabilities either in constructive development or destructive method of annihilation.
- The problem is that there is no quantum leap in the ethics of Golden Rule and Jealousy/hate crime.

Nuclear Cain

- The core of the problem of humanity in the 21st century is the rise of Nuclear Cain, brutal force which have the capability to destroy and annihilate human being.
- More frightening is that humankind have never came to sanity to reject that Cain with nuclear weapon wandering around the world with "populist" slogan against "oppression".

Human Transformation

- Humankind has eaten the fruit of "judgement" the tree of knowledge how to distinguish between good and bad but they haven't eaten the fruit of eternality.
- In the next century the probability and possibility of human being transformation into "immortal" human with stem cells components well developed to rejuvenate homo sapiens will be a new unprecedented challenge for humanbeing.

New Galilean Theory

- The revolutionary biogenetic development with its "immortal human being" will create a situation when human can play God with people be rejuvenated continuously where there is no different physical appearance between grandmother and granddaughter.
- Religion need to be transformed not to be left behind as in the past Galilean irony.

God Infinite.0 not God 3.0 etc

- Once the "physical human body" could be preserved "forever" with sustainable flesh human organs", the soul will live "eternally" in the same human being, never before happened in the homo sapiens history since the first Adam.
- The soul will need a God infinite.zero version and not just God 0,0;1.0,2.0.3.0 of Abrahamic religion. Real God is certainly much bigger than Abraham and his descendants.

Are we Ready

- Are we ready for that God.Infinite.Zero.
- Will Osama bin Laden exploit Huntington theory to commit global humankind suicide with nuclear from Teheran Pyongyang to create caliphate and or another Genghis Khan type imperium from North Korea.
- Will 7th century religion dictate 21st century "modern immortal humankind" with their predatory war on "infidel civilization".

Politically Incorrect

- I am afraid the populist and modern nuclearized Cain will control public opinion of the world with their appeasement towards those coalition of predatory 7th century outdated religion and 19th century bankrupt communist ideology.
- Sometime my ratio is too short to understand God's mysterious planning and history which He disposes for us.

THANK YOU
